AIM-USA: AIM is a leading manufacturer of Avionics Test Simulation Products, OEM products & superior analysis software for MIL-STD-1553, ARINC 429, et. al. (www.aim-online.com)

Arestech (via WDL): Full range of intelligent systems including embedded box PCs, industrial panel PCs, and multi-touch displays (arestech.com.tw)

Colmek.com: Qualified small business supplier of engineering services, rugged military-grade embedded computers, and other defense systems (www.colmek.com)

concurrent: Manufacturer of rugged, high-performance mil-grade VPX, VME, cPCI, XMC & PMC modules including broad line of SOSA 3U VPX solutions (www.gocct.com)

Dataforth: Signal conditioning/isolation modules, power monitor modules & cost-effective MAQ-20 Data Acquisition System, optional software, N.I. VI's & Python support (www.dataforth.com)

Diamond Systems: Rugged PC/104 boards with integrated I/O (analog, digital, counter/timers), communication modules, rugged Ethernet/GbE switches, GPU options (www.diamondsystems.com)

DITHD: Display Integration Technologies rugged standalone & rackmount sunlight readable & high bright displays at affordable pricing (www.dithd.com)

ELMA Electronic: Eurocard VME/VPX/cPCI chassis solutions with optional SBCs, memory, storage, Ethernet switch/routers (www.elma.com)

Optima rugged cabinets, **Stantron** racks, Rugged/Mobile Carts, tabletop enclosures, Robomolded transit cases, accessories (www.elma.com/en/products/cabinets-and-racks)

One Stop Systems: Rugged high-performance compute/GPU & storage products with AI/ML, sensor fusion & autonomous capabilities (onestopsystems.com)

Portwell: Single-board computers, embedded computers, rackmount computers, communication appliances, & human-machine interfaces (<https://portwell.com>)

Sealevel Systems, Inc.: US manufacturer of rugged serial, digital & analog cellular IoT products, HMI displays, COM carrier boards & fanless embedded systems (www.sealevel.com)

UDinfo: Total-memory-solution provider; high-reliability & longevity SSD, NAND Flash & DRAM for industrial, medical & military applications (www.udinfo.com.tw)

VITEC: IP streaming solutions give ultra-low latency and security the highest clearance from the field to headquarters (www.vitec.com)

WOLF Advanced Technology: Rugged Video Modules for Aerospace and Defense - capture, process, encode, display, AI inference - NVIDIA, AMD, Xilinx (www.wolfadvancedtechnology.com)

Serving: Ohio, Michigan, Indiana, Kentucky, West Virginia & Western Pennsylvania

Offices in: Cleveland, Detroit & Columbus

Single Board Computers (SBCs) - Rugged/Extended Temp

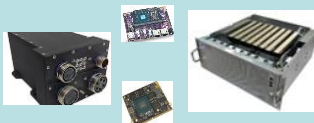

- Diamond
- Portwell

Computer-On-Modules (COMs, e.g. COM Express, SMARC, Mini-SOM)

- Portwell
- Sealevel

NVIDIA GPU Modules, Carriers & Systems

- Concurrent
- Diamond
- OSS
- Wolf

SSDs (Solid State Disks) - Rugged Extended Temp

- UDinfo

Fanless Rugged Computers

- Arestech
- Portwell
- Sealevel

Military-grade Computers (w/ 38999 connectors)

- Concurrent

Industrial & Military Chassis (VPX, VME, cPCI, new VNX) & Enclosures

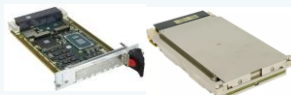

- Elma

PCIe Chassis, PCIe Expansion, & Very Large Capacity Storage Systems

- OSS (One Stop Systems)

VPX, VME, cPCI, new VNX Modules (SBC, switches, I/O) & Systems

- Concurrent
- Elma

Gigabit Ethernet Switch Rugged Boards & Standalone Boxes (with optional mil connectors)

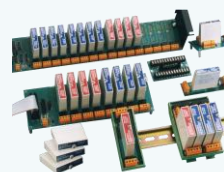

- Diamond

Data Acquisition Modules, Boards & Systems

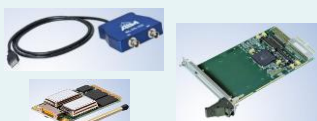

- Dataforth
- Diamond
- Sealevel Systems

Signal Conditioning Modules

- Dataforth

Avionics Databus (e.g. 1553, 429, AFDX) Modules, Boards & Software (for Test, Analysis and Simulation)

- AIM USA

Rugged High-performance Computing & Video I/O Boards, Modules & Systems

- Wolf

Flat Panel Displays (Rugged & Military-grade)

- DITHD
- Portwell
- Sealevel

19" Rack Cabinets & Enclosures

- Optima Stantron (Division of Elma)
